CONTENTS

Volume 55, Issue Nos. 1–12 (2002)

International Journal for

NUMERICAL METHODS IN ENGINEERING

Issue No. 1

Higher-order boundary element methods for transient diffusion problems. Part I: Bounded flux formulation: M. M. Grigoriev and G. F. Dargush 1

Higher-order boundary element methods for transient diffusion problems: Part II: Singular flux formulation: G. F. Dargush and M. M. Grigoriev 41

Genetic algorithm for discrete-sizing optimal design of trusses using the force method: A. Kaveh and V. Kalatjari 55

Path-following analysis of thin-walled structures and comparison with asymptotic post-critical solutions: G. Garcea, G. A. Trunfio and R. Casciaro 73

A monolithic smoothing-gap algorithm for contact-impact based on the signed distance function: T. Belytschko, W. J. T. Daniel and G. Ventura 101

Issue No. 2

An orthotropic damage model for masonry structures: L. Berto, A. Saetta, R. Scotta and R. Vitaliani 127

An augmented spatial digital tree algorithm for contact detection in computational mechanics: Y. T. Feng and D. R. J. Owen 159

A feature-preserving volumetric technique to merge surface triangulations: J. R. Cebral, F. E. Camelli and R. Löhner 177

This journal's homepage, where a Cumulative Author, Title and Subject Index is freely available, as well as a Conference Diary and Award Announcements, can be found at the address:

The *International Journal for Numerical Methods in Engineering* is covered by the following abstracting and indexing services: Applied Mechanics Reviews, BHRA Fluid Engineering Centre (Elsevier), Cambridge Scientific Abstracts/Materials Information, CompuMath Citation Index® (ISI), Current Contents®/Engineering, Computing & Technology (ISI), Earthquake Engineering Abstracts (NISEE), Ei COMPENDEX PLUS, Ei Page One, Geobase (Elsevier), Geotechnical Abstracts (Geotext Services), Indian Society of Earthquake Technology Bulletin, INSPEC, International Aeronautical Abstracts & Database (AIAA), International Civil Engineering Abstracts (Emerald), International Petroleum Abstracts, ISI Alerting Services, Materials Science Citation Index (ISI), Mathematical Reviews, Mechanics, PASCAL Database (INIST), Science Citation Index Expanded (also known as SciSearch®) (ISI), Science Citation Index® (ISI), Shock & Vibration Digest (Sage), Tribology and Corrosion Abstracts, Zentralblatt für Mathematik/Mathematic Abstracts.

Classical and advanced multilayered plate elements based upon PVD and RMVT. Part 1: Derivation of finite element matrices: E. Carrera and L. Demasi 191

Accurate reanalysis of structures by a preconditioned conjugate gradient method: U. Kirsch, M. Kocvara and J. Zowe 233

Issue No. 3

Classical and advanced multilayered plate elements based upon PVD and RMVT. Part 2: Numerical implementations: E. Carrera and L. Demasi 253

A new variable-order singular boundary element for two-dimensional stress analysis: K. M. Lim, K. H. Lee, A. A. O. Tay and W. Zhou 293

Micromechanics of fibre glass composites at elevated temperatures: A. Tesar, D. Sotakova and M. Minar 317

Arbitrary order edge elements for electromagnetic scattering simulations using hybrid meshes and a PML: P. D. Ledger, K. Morgan, O. Hassan and N. P. Weatherill . . . 339

Meshless formulations for simply supported and clamped plate problems: J. Sladek, V. Sladek and H. A. Mang 359

Issue No. 4

An efficient diagonal preconditioner for finite element solution of Biot's consolidation equations: K. K. Phoon, K. C. Toh, S. H. Chan and F. H. Lee 377

Relaxation iterative algorithms for solving cathodic protection systems with non-linear polarization curves: W. Sun 401

Linear and non-linear finite element error estimation based on assumed strain fields: F. Gabaldón and J. M. Goicolea 413

Material state remapping in computational solid mechanics: M. M. Rashid 431

Mesh data structure selection for mesh generation and FEA applications: R. V. Garimella 451

Application of proper orthogonal decomposition to the discrete Euler equations: C. L. Pettit and P. S. Beran 479

ERRATUM 499

Issue No. 5

Semi-discretization method for delayed systems: T. Insperger and G. Stépán 503

Evaluation of three unstructured multigrid methods on 3D finite element problems in solid mechanics: M. Adams 519

Flow-induced vibrations of non-linear cables. Part 1: Models and algorithms: C. Evangelinos, D. Lucor, C.-H. Su and G. E. Karniadakis 535

Flow-induced vibrations of non-linear cables. Part 2: Simulations: D. Lucor, C. Evangelinos, L. Imas and G. E. Karniadakis 557

Lower bound limit analysis using non-linear programming: A. V. Lyamin and S. W. Sloan 573

A new finite-element formulation for electromechanical boundary value problems: C. M. Landis 613

Issue No. 6

On the classical shell model underlying bilinear degenerated shell finite elements: general shell geometry: M. Malinen 629

Active control of FGM shells subjected to a temperature gradient via piezoelectronic sensor/actuator patches: K. M. Liew, X. Q. He, T. Y. Ng and S. Kitipornchai 653

Elasto-plasticity revisited: numerical analysis via reproducing kernel particle method and parametric quadratic programming: K. M. Liew, Y. C. Wu, G. P. Zou and T. Y. Ng 669

High-order predictor–corrector algorithms: H. Lahmam, J. M. Cadou, H. Zahrouni, N. Damil and M. Potier-Ferry 685

An improved four-node hybrid-mixed element based upon Mindlin's plate theory: R. Ayad and A. Rigolot 705

Axisymmetric modal analysis of liquid-storage tanks considering compressibility effects: J. R. Cho, K. W. Kim, J. K. Lee, T. H. Park and W. Y. Lee 733

Issue No. 7

A time-stepping method for stiff multibody dynamics with contact and friction: M. Anitescu and F. A. Potra 753

Flapwise bending vibration of rotating plates: H. H. Yoo and S. K. Kim 785

Automatic construction of non-obtuse boundary and/or interface Delaunay triangulations for control volume methods: N. Hitschfeld and M.-C. Rivara 803

A multilevel genetic algorithm for the optimum design of structural control systems: Q. S. Li, D. K. Liu, A. Y. T. Leung, N. Zhang and Q. Z. Luo 817

Evaluating wetting and drying algorithms for finite element models of shallow water flow: M. S. Horritt 835

An eight-node hybrid-stress solid-shell element for geometric non-linear analysis of elastic shells: K. Y. Sze, W. K. Chan and T. H. H. Pian 853

Issue No. 8

Strategies for computing goal-oriented *a posteriori* error measures in non-linear elasticity: F. Larsson, P. Hansbo and K. Runesson 879

A box scheme for transcritical flow: T. C. Johnson, M. J. Baines and P. K. Sweby . . 895

Discrete singular convolution and its application to the analysis of plates with internal supports. Part 1: Theory and algorithm: G. W. Wei, Y. B. Zhao and Y. Xiang 913

Discrete singular convolution and its application to the analysis of plates with internal supports. Part 2: Applications: Y. Xiang, Y. B. Zhao and G. W. Wei 947

An approach to the connection between subdomains with non-matching meshes for transient mechanical analysis: B. Herry, L. Di Valentin and A. Combescure 973

Issue No. 9

On the differentiation of the Rodrigues formula and its significance for the vector-like parameterization of Reissner-Simo beam theory: M. Ritto-Corrêa and D. Camotim . 1005

Refined second order semi-analytical design sensitivities: H. de Boer, F. van Keulen and K. Vervenne 1033

Numerical study of consistency of rate constitutive equations with elasticity at finite deformation: R. Lin 1053

Large-deformation and friction analysis of non-linear elastic cable networks by second-order cone programming: Y. Kanno, M. Ohsaki and J. Ito 1079

Solution of non-linear boundary integral equations in complex geometries with auxiliary integral subtraction: A. Mammoli 1115

Issue No. 10

Implicit J_2-bounding surface plasticity using Prager's translation rule: F. J. Montáns and R. I. Borja 1129

Efficient mixed Timoshenko–Mindlin shell elements: G. M. Kulikov and S. V. Plotnikova 1167

Guaranteed-quality triangular mesh generation for domains with curved boundaries: C. Boivin and C. Ollivier-Gooch 1185

Numerical methods for the topology optimization of structures that exhibit snap-through: T. E. Bruns, O. Sigmund and D. A. Tortorelli 1215

Buckling analysis of composite laminates under end shortening by higher-order shear deformable finite strips: G. P. Zou and S. S. E. Lam 1239

Issue No. 11

Improvements and algorithmical considerations on a recent three-dimensional model describing stress-induced solid phase transformations: F. Auricchio and L. Petrini . 1255

Strain-driven homogenization of inelastic microstructures and composites based on an incremental variational formulation: C. Miehe 1285

Buckling analysis for delaminated composites using plate bending elements based on higher-order zig-zag theory: J.-S. Kim and M. Cho 1323

Fast and robust Delaunay tessellation in periodic domains: K. E. Thompson 1345

LETTER TO THE EDITOR

Fidelity of the integrated force method solution: D. Hopkins, G. Halford, R. Coroneos and S. Patnaik 1367

Issue No. 12

The maximum principle violations of the mixed-hybrid finite-element method applied to diffusion equations: H. Hoteit, R. Mosé, B. Phillipe, Ph. Ackerer and J. Erhel . . . 1373

A continuum sensitivity method for finite thermo-inelastic deformations with applications to the design of hot forming processes: S. Ganapathysubramanian and N. . Zabaras 1391

All-hexahedral element meshing: automatic elimination of self-intersecting dual lines: N. A. Calvo and S. R. Idelsohn 1439

Life-cycle cost optimization of steel structures: K. C. Sarma and H. Adeli 1451

Direct modification for non-conforming elements with drilling DOF: C.-K. Choi, T.-Y. Lee and K.-Y. Chung 1463

Mesh-independent *p*-orthotropic enrichment using the generalized finite element method: C. A. Duarte and I. Babuška 1477
